

Unique truck concept with forward-facing seat and side-mounted mast

Unobstructed visibility of the forks, load and travel route

warehouseNAVIGATION (optional) optimizes approach time and significantly increases productivity

High flexibility through modular design and RFID technology

Jungheinrich® proprietary 3-phase AC technology for dynamic movement

High level of efficiency: double benefit of energy regeneration and effective energy management

Innovative, reliable Lithium-Ion technology

## EFX 410–413

### Turret Truck (Man-Down) (2,200 - 2,750 lbs.)

The EFX 410-413 series of turret trucks, featuring lift heights up to 23 feet and a maximum capacity up to 2,750 lbs., is designed to provide maximum versatility in very narrow aisle (VNA) warehouses. These turret trucks can be used with wire or rail guidance, increasing productivity and combining applications in very narrow aisles, wide aisles and staging areas.

Designed for operator comfort and productivity, the EFX turret trucks include a spacious and ergonomic compartment, featuring a comfortable footwell for easy entry and exit, a cushioned seat with height and weight adjustments and an automotive-style pedal layout.

Large storage areas and a functional ergonomic design, which includes centrally-positioned controls, help the operator work faster and more confidently with less physical demand.

With its forward-facing seat and a side-mounted mast, the EFX series raises the bar on visibility by providing operators with an unobstructed view of the load, travel route and racking during operation. The premium operating console, with its adjustable height and angle and large display, is placed at the center of the truck for added visibility and easy and effective operation.

With its innovative features, the EFX defines state-of-the-art VNA technology:

- Ergonomic, thumb-activated control of hydraulic functions for lifting, lowering, swiveling and traversing.
- Electric power steering enables precise positioning.
- Important operating data is displayed in pictograms on the large, graphic display.
- A wide range of available options ensures the truck can be configured specifically for your application.

# The Jungheinrich Advantage

Longer operating times

## Pioneering 3-phase technology

There are hundreds of thousands of Jungheinrich trucks with 3-phase AC technology in use worldwide today. The EFX uses constant application of this technology for drive, lift and steering. The advantages are:

- Lower energy consumption due to excellent efficiency in all motors.
- Stepless speed control of hydraulic motor.
- Optimal heat management allows for cooler operating temperatures.
- High torque for dynamic movement.
- Reduced maintenance resulting from the omission of wear-susceptible components (carbon brushes, commutator, contacts, etc.).

## Ergonomics and comfort

- Large footwell for easy entry and exit.
- Unobstructed view of the load and travel route.
- Cushioned comfort seat absorbs vibrations.
- Operating console with adjustable height and distance from the operator.
- Soft keys with numeric keypad.
- Ergonomic, single-handed operating lever controls hydraulic functions.

## Control and CAN-Bus system

- 70% fewer cables and plugs.
- All performance parameters can be adjusted.

## Economic energy management

- Doubled energy reclamation through regenerative braking and lowering.
- Longer operating times on a single battery charge (up to two shifts).
- Shorter charge times resulting in prolonged battery life.
- Run up to 16 hours on 1 charge.

## RFID transponder technology (optional)

- Continuous location identification for precise positioning and recognition of all warehouse areas.
- High flexibility regarding programming of truck performance limits based on location (end of aisle control, lift/travel cut-outs, travel speed reductions).
- Optimization of travel speed relative to floor conditions.

## Jungheinrich warehouse NAVIGATION (optional)

- The EFX can be linked to a Warehouse Management System (WMS) by a radio data terminal or scanner.
- Direct loading of each destination through the truck computer.
- Automatic vertical and horizontal positioning.
- RFID location detection ensures accuracy in reaching correct destinations.
- High level of flexibility in the warehouse with adaptation to existing WMS.
- Gain up to 25% higher throughput.
- Significantly increase productivity and throughput by eliminating pick-errors.

## Commissioning and maintenance

- Quick and reliable commissioning using "teach-in" process.
- Up to 500 operating hour service intervals.
- Electronic system with wear-free sensors.

## Integrated Jungheinrich Personnel Protection System (PPS)

- An available option that is factory-installed and integrated into the lift truck's electronic control system/ CAN-Bus.
- Senses presence of pedestrians in working aisle and alerts operator; slows and/or stops the truck as programmed.

## Lithium-ion Package Advantages

- Fast charging with no need for battery exchanges
- Maintenance-free with no odors from gases or acidification
- Longer service life and lower maintenance compared with lead-acid batteries
- Charging can be interrupted at anytime
- 5-year battery warranty included

## Additional optional equipment

- Mechanical rail guidance.
- Wire guidance for precise control in the aisles without any mechanical wear of components.
- Synchronized rotation of forks.
- Modular system for lift/drive cut-outs and travel speed reduction.
- Jungheinrich radio data terminals with mechanical and electrical support for material flow management systems.

## Lithium-Ion technology

Jungheinrich Lithium-Ion batteries are energy efficient, compact and long lasting with fast charging times, no maintenance requirement and extended life expectancy\*.

- Innovative and reliable
- Significant long-term return on investment
- Allows for continuous truck availability 24/7
- 5-year guarantee

## Parts when you need them

Jungheinrich's Parts Fast or Parts Free Guarantee ensures next-business-day delivery by 5:00 PM of all Jungheinrich parts in the United States, or they're free, including freight. For customers in Canada and Mexico, the guarantee ensures shipping of parts within 24 hours from the time the order was placed by the dealer. See your local Jungheinrich dealer for program details.

\* Programs may be subject to change without notice and may vary by region. Please ask your local Jungheinrich dealer for complete terms and conditions.
