5 YEAR
POWERTRAIN
WARRANTY

Description

These 4,400-5,500 lb. capacity multi-directional reach trucks can be used for efficient stacking and retrieval at high lift heights and for long loads that need to be transported in narrow aisles. With electric all-wheel

steering, these trucks can transport loads up to 26.2 feet long, maximizing space in the warehouse. A true multi-directional reach truck, the ETV Q series truck has five travel programs available, ranging from modified standard travel to rotational travel and all-wheel parallel travel.

Shipping & pickup

Buyer is responsible for shipping arrangements and all costs related to transporting the equipment including permits, tear-down, cranes, or other incidentals that may be required to legally transport your purchase.

Following the settlement of the outstanding balance, arrangements must be made immediately to have equipment picked up within ten (10) business days as Toromont may, at its discretion, assess storage fees.
