Description

Versatility is key with the PWR30/PWR40, making it the prime solution for a wide variety of applications, including low-level order picking, long distance transporting and loading / unloading trailers. For ground-level jobs, its efficiency and travel speed of up to 9.3 mph are hard to match. The 6,000 lb. and 8,000 lb. walkie end-rider can be equipped with ergonomic features, such as a suspended operator platform – helping to take some of the stress out of long runs.

Shipping & pickup

Buyer is responsible for shipping arrangements and all costs related to transporting the equipment including permits, tear-down, cranes, or other incidentals that may be required to legally transport your purchase.

Following the settlement of the outstanding balance, arrangements must be made immediately to have equipment picked up within ten (10) business days as Toromont may, at its discretion, assess storage fees.
